PERSONAL PROFILE

Junior Full-Stack Web Developer with experience in building modern web applications using Laravel, Vue.js, Tailwind CSS, and MySQL. Previously worked with VB.NET, SQL Server, and SAP Crystal Reports in desktop application development. Passionate about creating clean, user-friendly applications and continuously improving through hands-on projects and learning.

PROFESSIONAL EXPERIENCE

Contract Software Developer (Part-time)

2024–2025

- Collaborated with the development team by developing and submitting VB.NET forms for review and integration into the production codebase, contributing to new features and system enhancements.
- Reported software issues and errors to the development team, helping identify and resolve bugs during development and maintenance.
- Installed and updated the application on client desktop computers, ensuring users had the latest system version.

On-the-Job Trainee

2023–2024

- Collaborated with a fellow OJT trainee and the company's IT personnel to develop a field findings and promissory note management system using VB.NET, SQL Server, and SAP Crystal Reports, contributing to the computerization of manual processes.
- Designed, developed, and enhanced application features under the guidance of the company's IT personnel, delivering functional modules for the system.
- Fixed software issues and implemented improvements throughout development, helping maintain the system's functionality and usability.
- Deployed the completed system across three company branches, supporting successful adoption by end users and improving operational efficiency.

PERSONAL PROJECTS

ChatTayo

- Developed a real-time messaging application using Laravel, Laravel Reverb, Laravel Echo, Vue.js, Tailwind CSS, and MySQL, implementing instant messaging, user presence, and persistent chat history.

Inventory Management System

- Built an inventory management system using Laravel, Vue.js, Tailwind CSS, and MySQL, implementing stock monitoring, purchase order management, sales order management, status tracking, and Chart.js dashboards for inventory analytics.

Expense Tracker App

- Developed a personal expense tracker using a custom PHP MVC architecture, enabling CRUD operations and monthly financial summaries.

EDUCATION

Bachelor of Science in Information Technology

Sultan Kudarat State University

Graduated: 2024
